INDEX FOR VOLUME 32

Alf, Edward F., Jr. (with Donald D. Dorfman). The classification of individuals into two criterion groups on the basis of a discontinuous payoff function. 115–123.

Anderson, H. E., Jr. (with W. L. Bashaw). A correction for replicated error in correlation coefficients. 435–441.

Assakul, Kwanchai (with Charles H. Proctor). Testing independence in two-way contingency tables with data subject to misclassification. 67–76.

Baker, Frank B. (with Raymond O. Collier, Jr. and Garrett K. Mandeville). Tests of hypothesis in a repeated measures design from a permutation viewpoint. 15–24.

Baker, Frank B. (with Raymond O. Collier, Jr., Garrett K. Mandeville, and Thomas F. Hayes). Estimates of test size for several test procedures based on conventional variance ratios in the repeated measures design. 339–353.

Bashaw, W. L. (with H. E. Anderson, Jr.). A correction for replicated error in correlation coefficients. 435–441.

Bechtel, Gordon G. The analysis of variance and pairwise scaling. 47–65.

Bechtel, Gordon G. *F* tests for the absolute invariance of dominance and composition scales. 157–182.

Bennett, B. M. Note on a rank test of Cronholm and Revusky. 419–423.

Browne, Michael W. On oblique Procrustes rotation. 125–132.

Burr, E. J. (with Roderick P. McDonald). A comparison of four methods of constructing factor scores. 381–401.

Cartwright, Dorwin (with Terry C. Gleason). A note on a matrix criterion for unique colorability of a signed graph. 291–296.

Cliff, Norman (with Roger Pennell). The influence of communality, factor strength, and loading size on the sampling characteristics of factor loadings. 309–326.

Collier, Raymond O., Jr. (with Frank B. Baker and Garrett K. Mandeville). Tests of hypothesis in a repeated measures design from a permutation viewpoint. 15–24.

Collier, Raymond O., Jr. (with Frank B. Baker, Garrett K. Mandeville and Thomas F. Hayes). Estimates of test size for several test procedures based on conventional variance ratios in the repeated measures design. 339–353.

Comrey, Andrew L. Tandem criteria for analytic rotation in factor analysis. 143–154.

Cureton, Edward E. Difficulty scaling of recognition items. 195–198.

Dorfman, Donald D. (with Edward F. Alf, Jr.). The classification of individuals into two criterion groups on the basis of a discontinuous payoff function. 115–123.

Galanter, Eugene (with Vivian Gourevitch). A significance test for one parameter isosensitivity functions. 25–33.

Gibson, W. A. A latent structure for the simplex. 35–46.

Gibson, W. A. Properties and applications of Gramian factoring. 425–434.

Gleason, Terry C. (with Dorwin Cartwright). A note on a matrix criterion for unique colorability of a signed graph. 291–296.

Gourevitch, Vivian (with Eugene Galanter). A significance test for one parameter isosensitivity functions. 25–33.

Harary, Frank (with Edgar M. Palmer and Ronald C. Read). The number of ways to label a structure. 155–156.

Harris, Chester W. On factors and factor scores. 363–379.

Hayes, Thomas F. (with Raymond O. Collier, Jr., Frank B. Baker, and Garrett K. Mandeville). Estimates of test size for several test procedures based on conventional variance ratios in the repeated measures design. 339–353.

Johnson, Stephen C. Hierarchical clustering schemes. 241–254.
Jöreskog, Karl G. Some contributions to maximum likelihood factor analysis. 443–482.
Kristof, Walter. Orthogonal inter-battery factor analysis. 199–227.
Lewis, Charles (with Melvin R. Novick). Coefficient alpha and the reliability of composite measurements. 1–13.
Lockhart, R. S. Asymptotic sampling variances for factor analytic models identified by specified zero parameters. 265–277.
Lunneborg, Clifford E. Developing prediction weights by matching battery factorings. 133–141.
Maik, R. L. (with J. N. Srivastava). On a new property of partially balanced association schemes useful in psychometric structural analysis. 279–289.
Mandeville, Garrett K. (with Raymond O. Collier, Jr., and Frank B. Baker). Tests of hypothesis in a repeated measures design from a permutation viewpoint. 15–24.
Mandeville, Garrett K. (with Raymond O. Collier, Jr., Frank B. Baker, and Thomas F. Hayes). Estimates of test size for several test procedures based on conventional variance ratios in the repeated measures design. 339–353.
McDonald, Roderick P. Numerical methods for polynomial models in nonlinear factor analysis. 77–112.
McDonald, Roderick P. (with E. J. Burr). A comparison of four methods of constructing factor scores. 381–401.
Novick, Melvin R. (with Charles Lewis). Coefficient alpha and the reliability of composite measurements. 1–13.
Palmer, Edgar M. (with Frank Harary and Ronald C. Read). The number of ways to label a structure. 155–156.
Pennell, Roger (with Norman Cliff). The influence of communality, factor strength, and loading size on the sampling characteristics of factor loadings. 309–326.
Proctor, Charles H. (with Kwanchai Assakul). Testing independence in two-way contingency tables with data subject to misclassification. 67–76.
Read, Ronald C. (with Frank Harary and Edgar M. Palmer). The number of ways to label a structure. 155–156.
Schönemann, Peter H. (with Ledyard R Tucker). A maximum likelihood solution for the method of successive intervals allowing for unequal stimulus dispersions. 403–417.
Singh, Jagbir (with W. A. Thompson). The use of limit theorems in paired comparison model building. 255–264.
Sjöberg, Lennart. Successive intervals scaling of paired comparisons. 297–308.
Srivastava, A. B. L. (with Harold Webster). An estimation of true scores in the case of items scored on a continuous scale. 327–338.
Srivastava, J. N. (with R. L. Maik). On a new property of partially balanced association schemes useful in psychometric structural analysis. 279–289.
Thompson, W. A. (with Jagbir Singh). The use of limit theorems in paired comparison model building. 255–264.
Tucker, Ledyard R (with Peter H. Schönemann). A maximum likelihood solution for the method of successive intervals allowing for unequal stimulus dispersions. 403–417.
Webster, Harold (with A. B. L. Srivastava). An estimation of true scores in the case of items scored on a continuous scale. 327–338.
Wiley, David E. Latent partition analysis. 183–193.

BOOK REVIEWS

Erdmann, J. B. Review of "Nathan Kogan and Michael Wallach *Risk Taking: A Study in Cognition and Personality.*" 484–485.
Findley, Warren G. Review of "Anne Anastasi (Ed.) *Testing Problems in Perspective.*" 356–358.

HOPKINS, KENNETH D. (with Robert A. Smith). Review of "Paul Horst *Psychological Measurement and Prediction.*" 355–356.

MCCALL, JOHN N. Review of "Robert N. Gagné (Ed.) *Learning and Individual Differences.*" 358–360.

MCCALL, J. N. Review of "Edwin E. Ghiselli *The Validity of Occupational Aptitude Tests.*" 483–484.

SMITH, ROBERT A. (with Kenneth D. Hopkins). Review of "Paul Horst *Psychological Measurement and Prediction.*" 355–356.

Zieky, M. J. Review of "Philip J. Stone, Dexter C. Dunphy, Marshall S. Smith, and Daniel M. Ogilvie *The General Inquirer: A Computer Approach to Content Analysis.*" 485–486.
